

BlastRFQ

Proud to represent US manufacturers. Technology-enabled domestic sourcing and supplier development for the industrial base and the agencies that depend on it.

CAPABILITY STATEMENT

COMPANY OVERVIEW

BlastRFQ LLC finds capable US manufacturers, matches specific parts to the shops whose equipment actually fits them, and supports those shops through sourcing, quoting, and fulfillment. Our software reads customs and manufacturing records to surface where domestic production can replace imports, and our capability-matching engine gates every match against a shop's real machine envelope before a quote is ever requested. The result is faster, verifiable domestic sourcing and a broader, better-qualified small-business supplier base.

CORE COMPETENCIES

- Domestic supplier sourcing and scouting (customs bill-of-lading intelligence plus daily NIST MEP supplier-scouting monitoring)
- Part-to-shop capability matching against real machine envelopes: stamping, deep draw, machining, fabrication, weldment, casting
- RFQ distribution to a vetted US manufacturing supplier network
- Reshoring and total-cost-of-ownership analysis using current Section 232 and duty stacks
- Small-manufacturer development into the federal supply base (SAM registration, NIST 800-171 self-assessment, DD 2345 / JCP guidance)

DIFFERENTIATORS

- Software-driven capability matching, not a generic broker directory. Parts are gated for makeability before anyone spends estimating time.
- Verified shop capability envelopes plus customs-level import intelligence that competitors do not read, refreshed daily.

If only four shops in America can make your part, we know which four.

PROOF, NOT PROMISES

- Formal partnership with the Reshoring Initiative (Harry Moser) on the 2026 national reshoring survey, distributed to tens of thousands of US manufacturers.
- NIST SP 800-171 self-assessment on file in SPRS, UID SB00156330 (DFARS 252.204-7012 posture); signed security policy set.
- DD 2345 / JCP application filed July 2026; active in the DLA DIBBS small-business supply base.
- Affiliate CutStep AI LLC: 30 State of Illinois bids filed in July 2026 (BidBuy V00049474); Illinois State Board of Elections Registration No. 70789.
- Represented shops are ISO 9001:2015 certified and serve aerospace, military, medical, electronics, automotive, and semiconductor customers today.
